4	AIRE CONDITIONING & CLEANING MULTIPURPOSE DISINFECTING SOLUTION is a combination of special agents, that cleans your lenses better, removes protein more effectively, makes your lenses germ free and keeps them moist & well lubricated so that they are more comfortable on your eyes, pH & isotonicity are adjusted to lacrimal fluid.

SPECIAL ADVANTAGES

SODIUM HYALURONATE

Forms a lubricating shield to keep in moisture for long lasting eye comfort.

HPMC

Forms a lubricating shield to keep in moisture for long lasting eye comfort.

POLYHEXANIDE

A disinfectant and preservative with powerful biocidal efficacy.

CHLORHEXIDINE GLUCONATE

A disinfectant and preservative with powerful biocidal efficacy.

POLOXAMER

A gentle surfactant and cleaning agent. Removes protein, dirt and debris.

SODIUM PHOSPHATE BUFFER

Keeps solution pH balanced and enhances performance of added electrolytes (sodium and potassium chloride) for more natural lens wear.

INTENDED FOR USE

When use as directed, **AIRE CLEAR, MOIST & REFRESHING MULTIPURPOSE DISINFECTING SOLUTION/IGEL PLUS MULTIPURPOSE DISINFECTING SOLUTION/ENCORE ALL-IN-ONE SOLUTION** cleans, rinses, disinfects, lubricates, moisturizes, removes protein and stores contact lenses. The solution is indicated for **all soft contact lenses under Daily Wear and Frequent Replacement**. The packaging includes a lens case for storage of contact lenses during chemical disinfection.

When use as directed, **AIRE CONDITIONING & CLEANING MULTIPURPOSE DISINFECTING SOLUTION** cleans, rinses, disinfects, lubricates, moisturizes, removes protein and stores contact lenses. The solution is **only indicated for rigid gas permeable and hard contact lenses** and strictly not to be used on soft contact lenses. The packaging includes a lens case for storage of contact lenses during chemical disinfection.

COMPLIANCE AND HYGIENE

- Customers are urged to follow the recommendations for Clean and Safe Contact Lens Wear.
- Carefully and regularly clean contact lenses, as directed by an Optometrist / Lens Care Practitioner and the patient information included with the lens care product.
- Wash and dry hands before putting on or removing lenses.
- Do not wear lenses beyond the recommended period.
- Store lenses in the proper case and replace the lens storage case at least every three months. Clean the contact lens case after each use with Contact Lens Care Solution and keep the case open and air dry between cleanings.
- Only fresh solution should be used to clean and disinfect contact lenses. Never re-use old solution. Contact lens care solution must be changed every day, even if the lenses are not use daily.
- Remove and stop using lenses if you experience unusual eye symptoms; seek medical consultation if necessary.

CONTRAINDICATIONS (REASONS NOT TO USE)

There are no known contraindications for use of the products as listed above. If you are allergic to any ingredient in this product, please do not use.

DIRECTIONS FOR USE

A) CLEANING / DISINFECTING / STORING

1. Always wash your hands and dry them with a clean towel before handling your lenses. Always start with the same eye to avoid confusion.
2. Open the lens case, remove the lens and place it on the palm of your hand.

3. Apply at least 3 drops of the solution to each lens surface.
4. Gently rub the lens using a backward and forward motion for 10 seconds per side.
5. Rinse both lens surfaces thoroughly with the solution while rubbing the lens gently between the thumb and forefinger.
6. Place the lens in the lens case and fill the well with the solution.
7. Replace the cap and screw tight. Repeat the procedure with the other eye's lens.
8. Allow your lenses to soak for at least 4 hours. Your lenses are now clean and disinfected and may be inserted directly into your eye.

B) INSERTING YOUR LENSES

1. Make sure your hands are washed with a mild soap, rinsed thoroughly and dried with a lint-free towel before inserting your lenses.
2. Remove the right eye's lens from the storage case. Clean and rinse the lens with **AIRE CLEAR, MOIST & REFRESHING MULTIPURPOSE DISINFECTING SOLUTION/IGEL PLUS MULTIPURPOSE SOLUTION/ENCORE ALL-IN-ONE SOLUTION/AIRE CONDITIONING & CLEANING MULTIPURPOSE DISINFECTING SOLUTION.**
3. Place the lens on the tip of your right-hand index finger.
4. Place the middle finger of the same hand close to your lower eyelashes and hold down the lower lid. Pull upper eyelid upwards with the middle finger of the left hand.
5. Look straight ahead and gently place the lens on your eye.
6. Gently release the lid and blink. The lens will center itself automatically.
7. Repeat procedure on the left eye's lens.
8. Use a mirror if necessary.
9. Check to be sure that the lens is centered by covering the other eye. If your vision is crisp and clear then the lens is in place.

C) REMOVING YOUR LENSES

1. Remove cosmetics and make-up only after you have removed the lens.
2. Please ensure your hands are washed, rinsed and dried.
3. Begin procedure with the right eye.
4. Pull the lower lid down with the middle finger of your right hand.
5. Look upward, slide lens to lower part of the eye with your forefinger.
6. Gently pinch the lens between the thumb and forefinger and remove from the eye.
7. Clean and rinse your lens with **AIRE CLEAR, MOIST & REFRESHING MULTIPURPOSE DISINFECTING SOLUTION/IGEL PLUS MULTIPURPOSE SOLUTION/ ENCORE ALL-IN-ONE SOLUTION/AIRE CONDITIONING & CLEANING MULTIPURPOSE DISINFECTING SOLUTION** and put them back into your lens storage case before removing lens from the other eye.

HEALTHY RELATIONSHIP WITH YOUR CONTACT LENS

1. Avoid strong, oily soaps while washing your hands. Make sure you rinse and dry your hands before handling your lenses.
2. Make sure your surroundings are smooth and clean. If you are using a basin/sink, make sure the plug is in to ensure that the lens does not get drained away.
3. Always clean and disinfect lenses before re-insertion into your eyes.
4. Always use fresh solution from the bottle. Never re-use solution left in the lens storage case.
5. Do not store or rinse lenses with tap water.
6. Use only the lens case provided to store your lenses.
7. Make sure the lens is fully immersed in the solution. Never use lenses unless fully hydrated (wet) in solution.
8. Always keep your lens case clean. Wash and rinse lens case with **AIRE CLEAR, MOIST & REFRESHING MULTIPURPOSE DISINFECTING SOLUTION/IGEL PLUS MULTIPURPOSE SOLUTION/ENCORE ALL-IN-ONE SOLUTION** and air dry every day.
9. Check before insertion that the lens is not turned inside-out.
10. When inserting your lenses, always start with the same eye to avoid confusion.
11. The lens can never be lost in your eye. Use a well-lit mirror to help locate your lens, it will probably be on the inside of your eyelid.
12. Do not re-center the lens on the cornea with your finger on the lens. Instead use your eyelid to move and reposition the lens.
13. Avoid touching lenses with your finger nails. Make sure your finger nails are short and smooth.
14. If the lens is nicked or torn, do not wear it.
15. Avoid rubbing your eyes after you have inserted lenses. This can irritate your eyes or dislodge the lenses.
16. Do not allow lotion, soaps, creams, deodorants, hair sprays and cosmetics (especially metallic powders) to come in contact with the lenses. They can cause an eye infection or irritation.
17. Apply make-up only after inserting your lenses.

MORE SAFETY INFORMATION

1. Avoid eye make-up like eye liners as these can stain your lens.
2. Do not wear lenses overnight.
3. Avoid wearing lenses around fumes, irritating vapors, smoky or dusty conditions. This may irritate your eyes and/or damage the lenses.
4. Always wear swimming goggles while swimming with your lenses on.
5. On holidays, carry ample supply of solution. Make sure you have a spare pair of contact lenses.
6. Visit your eye-care practitioner regularly for a routine check-up.
